SUMMARY

Backend Engineer with 2.5+ years of experience turning business requirements into scalable, production-ready systems. Technology-agnostic problem solver with strong expertise in PHP, Laravel, APIs, databases, and backend architecture.

EXPERIENCE

Backend Developer

Freelancer @ Upwork

August 2023 – Present

- Developed scalable Laravel applications using Clean Architecture, SOLID principles, and optimized backend architecture.
- Optimized REST APIs, SQL queries, caching, and indexing to improve application performance and data retrieval.
- Implemented secure authentication and authorization using Sanctum, Passport, and validation.

Software Engineer

Borders & Gates

January 2026 – August 2026, Alexandria

- Engineered scalable queue-based workflows using Laravel Horizon to improve background job reliability and performance.
- Integrated third-party APIs and internal microservices to automate financial reporting and streamline data collection.
- Implemented custom middleware and automated validation workflows to improve data accuracy and document delivery.

Backend Developer

Softigital

May 2024 – January 2025, 6th October

- Architected and deployed 15+ scalable REST APIs in Laravel, maintaining 99.9% uptime across production web applications.
- Optimized MySQL database queries and indexing, cutting heavy-query execution times by 30% and improving overall server response speed.
- Implemented Git-based CI/CD deployment pipelines, reducing deployment times from 45 minutes to under 10 minutes.

PROJECT

Automind

automindai.ae • February 2026 – June 2026

- Built in-app and Firebase Cloud Messaging notifications for order, payment, and cash-handover events across multiple devices.
- Delivered English/Arabic localization and 45+ API contracts with a synchronized Postman collection for mobile/dashboard integration.
- Built AI Smart Insights that converts revenue, expense, and service-performance data into dashboard narratives.

Hasanat Borders n Gates

hasanat.org • January 2026 – March 2026

- Built a Laravel 11 REST API with ~200 endpoints for a multi-country donation platform across web and mobile.
- Integrated Stripe, PayPal, Apple Pay, and Google Pay with verified webhooks, refunds, and recurring donations (pause/resume/cancel).
- Developed Zakat, Qurban, multi-currency jobs, email-OTP 2FA, RBAC, Swagger/OpenAPI, Excel exports, and EN/FR localization.
- Optimized high-traffic APIs using Redis, composite indexes, eager loading, and query optimization.

Laundry Heroes

laundry-heroes.com • October 2025 – January 2026

- Built a Laravel 12 and MySQL REST API powering Customer, Driver, and Admin mobile apps.
- Developed role-based order workflows, real-time Firebase chat, and bilingual FCM notifications.
- Integrated Moyasar payments, Sanctum OTP authentication, analytics, promo codes, ratings, and Excel exports.

Sable

sablesweets.com • January 2024 – December 2024

- Developed and maintained the backend using Laravel 10, implementing scalable APIs and core business logic.
- Built secure authentication, database workflows, and backend services to support the platform's operations.
- Integrated APIs and optimized database queries to improve backend performance, reliability, and maintainability.

EDUCATION

Bachelor in Computer Science

Faculty Of Computer Science and AI • Helwan University • 2025 • 3.29

SKILLS

HTML, CSS, PHP, Laravel, MySQL, OOP, Design Patterns, CI/CD, Docker, SOLID, Queues, Firebase, Realtime, Familiar with NGINX, Familiar with NodeJS, Database Design, Caching
